Profile

I am a third-year Bachelor's student in Economic and Financial Mathematics at the Faculty of Mathematics, Physics and Informatics, Comenius University in Bratislava (expected graduation: June 2026). I have strong analytical thinking, a problem-solving mindset, and a keen interest in applying mathematics in finance. I work with tools such as Python, Excel (including VBA), and R, and I am passionate about data analytics and financial modelling. I am seeking an opportunity to gain experience through an internship in a financial or analytical environment.
