Profile

Graduate of the Economic and Financial Mathematics programme at Comenius University in Bratislava, and will be pursuing an MSc in Financial and Insurance Mathematics at Charles University Prague from autumn 2026. I have practical experience with analytical tools such as Python, Excel, and R, and I am interested in data analytics, financial and economic analysis, numerical methods, and financial modelling.

Education

09/2026 – expected	Financial and Insurance Mathematics, Faculty of Mathematics and Physics, Charles University Prague Focus: financial mathematics, statistics, econometrics, optimisation, programming, data analysis
09/2023 – 06/2026	Bachelor's in Economic and Financial Mathematics Faculty of Mathematics, Physics and Informatics, Comenius University in Bratislava Bachelor's thesis: Numerical Solution of the Black-Scholes Equation Using the Finite Volume Method
09/2015 – 06/2023	Grammar School, Bytča, Slovakia

Work Experience

06/2025 – 09/2025	Ride Operator Casino Pier, New Jersey, USA Seasonal work abroad focused on improving English and gaining international experience
06/2024 – 09/2024	Technical & Logistics Assistant COOP Jednota, Logistics Centre a.s. Team collaboration and work in a logistics environment
07/2023 – 09/2023 & 07/2022 – 09/2022	Construction Assistant REHAK s.r.o. Practical manual work experience

Projects

Bachelor's Thesis: Numerical Solution of the Black-Scholes Equation Using the Finite Volume Method

- Implementation of the Finite Volume Method and Finite Difference Method for option pricing; convergence, stability, and accuracy analysis in Python
- Grade: A

CFA Institute Research Challenge

- Participation in a team-based financial analysis of a company
- CFA Institute Research Challenge Certificate

Bond Portfolio Optimisation

- Portfolio optimisation to meet future cash-flow requirements using linear programming in Python

Efficiency Analysis using DEA (Data Envelopment Analysis)

- Implementation of CCR and BCC models to evaluate efficiency of decision-making units in Python

Linear Programming – Interior Point Method

- Implementation of a barrier method using Newton's method in Python

Skills

Analytical Tools

- Python (NumPy, SciPy, Matplotlib)
- Excel (VBA)
- R
- Microsoft Office

Mathematics & Statistics

- Probability, statistics, econometrics
- Linear programming
- Optimisation
- Financial modelling

Languages

- Slovak – native
- English – C1 (Cambridge English: Advanced – CAE Certificate)

Soft Skills

- Fast learner
- Ability to work independently and in a team

Interests

- Investing & financial markets, technology, strength training
